[Optimization of the simultaneous localization and map-building algorithm for real-time implementation](#) - all 9 versions »

J Guivant, EM Nebot - *Robotics and Automation, IEEE Transactions on*, 2001 - [ieeexplore.ieee.org](#)

Abstract—INTRODUCTION RELIABLE localization is an essential component of any autonomous vehicle system. The basic navigation loop is based on dead reckoning sensors that predict high-frequency vehicle manoeuvres and low-frequency ...

[The SPmap: a probabilistic framework for simultaneous localization and map building](#) - all 13 versions »

JA Castellanos, JMM Montiel, J Neira, JD Tardos - *Robotics and Automation, IEEE Transactions on*, 1999 - [ieeexplore.ieee.org](#)

Abstract—This article describes a rigorous and complete framework for the simultaneous localization and map building problem for mobile robots: the symmetries and perturbations map (SPmap), which is based on a general ...

[Localization and map building using laser range sensors in outdoor applications](#) - all 11 versions »

J Guivant, E Nebot, S Baiker - *Journal of Robotic Systems*, 2000 - [doi.wiley.com](#)

This paper presents the design of a high accuracy outdoor navigation system based on standard dead reckoning sensors and laser range and bearing information. The data validation problem is addressed using laser intensity ...

[Topological mobile robot localization using fast vision techniques](#) - all 4 versions »

P Blaer, P Allen - *Robotics and Automation, 2002. Proceedings. ICRA'02. IEEE ...*, 2002 - [ieeexplore.ieee.org](#)

In this paper we present a system for topologically localizing a mobile robot using color histogram matching of omnidirectional images. The system is intended for use as a navigational tool for the Autonomous Vehicle for Exploration ...

M Di Marco, A Garulli, A Giannitrapani, A Vicino - *Robotics and Automation, IEEE Transactions on*, 2003 - [ieeexplore.ieee.org](#)

Abstract—INTRODUCTION SELF-LOCALIZATION of autonomous agents has been considered a fundamental problem in mobile robotics for a long time. The problem has been tackled in several different frameworks and a number of efficient ...

H Baltzakis, P Trahanias - *Robotics and Automation, 2002. Proceedings. ICRA'02. IEEE ...*, 2002 - [ieeexplore.ieee.org](#)

Abstract—INTRODUCTION BUILDING autonomous mobile robots is one of the primary goals

of robotics and artificial intelligence research. In order to carry out complex

navigational tasks, an autonomous robotic agent must be able to provide ...

[Geometric constraint identification and mapping for mobile robots](#) - all 5 versions »

DJ Austin, BJ McCarragher - *Robotics and Autonomous Systems*, 2001 - Elsevier

A new method of map building for mobile robots is presented. Recent developments

have focused on grid-based mapping methods which suffer from the drawback of

their size, requiring a great deal of memory and prohibiting the use of ...

[A Hybrid Framework for Mobile Robot Localization: Formulation Using Switching State-Space Models](#) - all 8 versions »

H Baltzakis, P Trahanias - *Autonomous Robots*, 2003 - Springer

Abstract. In this paper we address one of the most important issues for

autonomous mobile robots, namely their ability to localize themselves safely and

reliably within their environments. We propose a probabilistic framework ...
