[Road-boundary detection and tracking using ladar sensing](#) - all 2 versions »

WS Wijesoma, KRS Kodagoda, AP Balasuriya - [Robotics and Automation](#), IEEE Transactions on, 2004 - [ieeexplore.ieee.org](#)

Abstract—Road-boundary detection is an integral and important function in advanced driver-assistance systems and autonomous vehicle navigation systems. A prominent feature of roads in urban, semi-urban, and similar environments, ...

[An evaluation of the sequential Monte Carlo technique for simultaneous localisation and map-building](#) - all 8 versions »

DCK Yuen, BA MacDonald - [Robotics and Automation](#), 2003. [Proceedings. ICRA'03. IEEE ...](#), 2003 - [ieeexplore.ieee.org](#)

Simultaneous Localisation and Mapbuilding (SLAM) can be considered as a combined state and parameter estimation problem. Instead of using Extended Kalman Filtering, the more flexible Sequential Monte Carlo method is considered. ...

[Robust image fusion using a statistical signal processing approach](#)

RS Blum - [Information Fusion](#), 2005 - Elsevier

Image fusion is studied using a very basic and reasonable mathematical model for the observed images. The model attempts to characterize the statistical aspects of the problem, including the impact of random distortions, like noise. The ...
